

Press Release

ROHR2 - SIGMA Partnership with ESTEQ Engineering in South Africa

Unna, Germany, June 2008

ESTEQ Engineering (Pty) Ltd. Pretoria, South Africa, is introduced as business partner of SIGMA GmbH, Germany for the sales and support of the CAE products ROHR2 and SINETZ in South Africa.

ESTEQ is the leading supplier of simulation & testing technology solutions in South Africa. ESTEQ as Engineering solution partner offers training on the products as well as product support covered by expert staff.

In May 2008 Mr. Kenny Mayhew-Ridgers, Business Development Manager at ESTEQ visited SIGMA in Germany for finalizing the partnership contracts and meetings with some of the pipe stress experts. SIGMA selected ESTEQ as a strong partner in Africa's most developing country to increase its position in the South African engineering software market for its products ROHR2 and SINETZ.

ROHR2 and SINETZ are products of SIGMA Ingenieuresellschaft mbH, Germany.

ROHR2 is one of the leading Pipe Stress Analysis tools, a standard software for static and dynamic analysis of piping systems and structural frameworks. The software is equipped by a range of additional features enhancing the engineer's daily job, as there are FEM analysis, isometric capabilities and a wide range of interfaces covering the leading CAD/CAE systems.

SINETZ, pressure drop and temperature loss analysis, completes the product range by offering a tool for the analysis of compressible and incompressible media in piping systems, integrated into the ROHR2 software environment.

Started and created by one of the main software vendors in Europe - mbp in Germany - in the late 1960s, ROHR2 continues its success by SIGMA from the end of the 1980s.

ROHR2 is the unique completely interactive piping analysis software and hence it offers significant time and cost reduction to your piping department.

SIGMA, established in 1989 in Dortmund, Germany has emerged as a partner of choice for leading international companies with its software and the wide variety of engineering services.

SIGMA is known as one of the leading engineering specialists in the Pipe Stress Business in Europe, offering field tested products, strongly adapted to the users needs.
