ROHR2 User Meeting 2011 D-A-CH-EU

Unna, Germany, May 2011

The ROHR2 User Meeting 2011 (D-A-CH –EU users) took place at May 10, 2011 in Schwerte, Germany, near the SIGMA company location.

A great number of ROHR2 users, interested people and experts in pipe construction, component analysis and pipe stress calculation came together to hear about new developments and additional modules in the program system ROHR2. The software users came together in order to compare notes and, learn about the effective use of the Program System ROHR2

The last ROHR2 user meeting was held in 2007. Because of organizational reasons and the great number of registrations to the user meeting SIGMA GmbH offered this event in German language. Additionally SIGMA announces a ROHR2 user meeting 2011 in English language at June 30, 2011

The main topics of the conference were changes and developments in ROHR2 release 31.0, among them the flange analysis with ROHR2flange as well as modeling and meshing using ROHR2fesu, the Finite Element component analysis module.

The conference concluded with a discussion of subjects which were brought up by the auditorium.

It is a good tradition in the history of the system ROHR2 program to keep the personal contact to the users by periodical user meetings. A lot of participants agreed the event to be successful and expressed their interest to participate at the next conference.

The ROHR2 Development and Sales Team is looking forward to welcome their guests at the next ROHR2 User Meeting.

About: ROHR2

ROHR2 is the leading European Software for Pipe Stress Analysis, a standard tool for pipe static and structural framework analysis, covering a variety of specifications like ASME, ANSI, EN 13480, STOOMWEZEN D1101, BS 7159 and ISO 14692. The software is equipped by a range of additional features enhancing the engineer's daily job, as there are FEM analysis (ROHR2FESU), isometric capabilities (ROHR2ISO) and a wide range of interfaces covering the leading CAD/CAE systems.

About: SIGMA

SIGMA, established in 1989 in Dortmund, Germany has emerged as a partner of choice for leading international companies with its software and the wide variety of engineering services. SIGMA is known as one of the leading engineering specialists in the Pipe Stress Business in Europe, offering field tested products, strongly adapted to the users needs.
